REASONS FOR ALLOWANCE

1. The following is a statement of reasons for the indication of allowable subject matter: The instant application discloses a method for reducing inter-block interference (IBI) in a signal transmitted in a communications channel by determining an optimum time of reference (TOR) for an impulse response of the communications channel. Prior art references show similar methods but fail to teach: **“generating a windowing function based on points along tails of the impulse response contributing non-uniform amounts of inter-block interference; generation a time of reference function based on the windowing function”**, as in claim 11.
